

Ilyes ABOURA

Power Platform Consultant

## Education

2020 - 2025

**Master's degree Applied artificial intelligence**

Université des Sciences et de la Technologie d'Oran

## Certification

## About Me

Power Platform Consultant with solid hands-on experience delivering scalable business solutions using Power Apps, Power Automate and Power BI. I contribute to the design and delivery of end-to-end applications, leveraging Power Platform extensibility such as custom plugins and Custom APIs to build reliable solutions that streamline processes and support operational efficiency.

## My Skills

Power Apps

Power BI

Azure

Power Automate

Dynamics 365

Web Development

## Work Experience

### Power Platform Consultant / Plugin Developer (2025 - Present)

Developed a responsive Power Apps Canvas application for a luxury client, implementing the front-end from Figma designs with fully adaptive layouts. Designed and automated workflows using Power Automate to streamline claims processing. Built custom plugins and Custom APIs to handle database interactions, execute specialized business logic, and integrate with external APIs and other systems. Led the deployment to Production across multiple international sites, ensuring environment configuration, solution packaging, and post-go-live stabilization. Currently supporting the solution in continuous maintenance mode while delivering new feature enhancements and performance improvements, resulting in a scalable, efficient, and maintainable enterprise-grade solution.

### Power Platform Consultant (2024 - Present)

Developed a Power Apps application for an insurance client to facilitate the collection of contractual documents in preparation for GED solution migration. Coordinated with the solution architect to define requirements, integrated with existing systems for a seamless transition, and delivered a user-friendly platform that optimized data capture and minimized processing time.

### Power Platform Consultant (2024)

Developed a WMS for an automotive client using Power Apps, supporting 180 logistics operators and managing tens of thousands of references. The solution streamlines stock handling, provides real-time inventory visibility, and includes Power BI dashboards for activity monitoring and performance management, while ensuring a scalable architecture aligned with business objectives.

### AI & Mobile App Developer (2024)

Led the end-to-end development of a Flutter-based mobile application supported by Azure Functions and Microsoft Dataverse, using AI and computer vision to analyze supermarket shelves and ensure merchandising compliance, enabling scalable retail use cases and improving operational efficiency and store performance.
